Ms. Lisa Lin – Project Manager
Global Fritz Logistics Service Co., Ltd.
11Fl, # 136 Roosevelt Road, Section 2
Taipei, Taiwan, ROC

Subject: Taiwan Power Company
Lungmen Project Fourth Nuclear Power Plant Units 1 and 2
Shipping of Nuclear Steam Supply System (NSSS) and Related Equipment

Dear Ms. Lin,

As it is coming to the end of year 2004, we would like to take this opportunity to thank you and your project team for successfully providing the freight forwarding services associated with the large number of shipment for the Lungmen Fourth Nuclear Project.

During the last two years, in addition to the shipments for many major equipment, the most important accomplishment for GE team is the delivery of two Reactor Pressure Vessels with over 1,000 M/Tons each; Closure heads and RPV Internal – Shrouds which are over 100 tons of heavy lift cargoes. By Global Fritz team's effort and hard work, the equipment has been successfully and safely transported from suppliers around the world and delivered to TPC Lungmen Jobsite.

Global Fritz's performance and ability in the execution of this project transportation have been excellent. We appreciate your past, present and continuing support at Global Fritz company.

Sincerely,

Quincy Hwang
Program Manager
GE Nuclear Energy
